Charles Dull
Cuyahoga Community College
Associate Dean, IT

Our ESC Members and guests have the rare opportunity to hear from a panel of business and education leaders in the Blockchain at our upcoming meeting, Thursday, May 2, 2019.

Blockchain technology is a distributed ledger system lauded for its credibility, security, transparency and reliability through encryption.

Car dealership owner and visionary **Bernie Moreno** brought the blockchain technology to the forefront and Cleveland civic leaders and higher education took notice.....the idea of Blockland Cleveland and Ownum began.

Ownum is a technology company focused on unlocking business growth and making government more efficient through the applications of distributed ledger technology.

Ownum's mission is to identify, support and commercialize the most promising application of this technology.
