

Unlocking the Future of AI Implementation

Professional Development & Training

- Role-based training facilitated for diverse audiences across all employee groups
- Flexible delivery: in-person, virtual, and asynchronous options to fit your organization
- Scalable training models that grow with your district or agency
- Onboarding-specific AI training for new hires across all roles and responsibilities
- Annual AI refresher courses that keep pace with the rapidly evolving landscape
- Training calibrated by expertise level—from foundational awareness to advanced application
- Organizational safety and responsible use woven into every session
- Workshops and multi-session institutes for leadership teams

AI Policy Development & Alignment

- Draft AI policies aligned to federal and state guidelines and regulations, as well as local operational needs
- Review and refine AI policies for compliance, clarity, and risk management
- Develop implementation timelines and rollout strategies for districts and agencies

Implementation Support

- Ongoing support throughout every phase of your AI implementation journey
- Hands-on troubleshooting for AI integration challenges in educational and government settings
- Continuous monitoring of AI trends, emerging tools, and legislative developments
- Expert guidance on AI governance frameworks, data privacy, and ethical use
- Implementation resources, practical tools, and ready-to-use templates
