

School Mental Health Community of Practice Evaluation of September COP Experience

30% of COP members (32 out of 105) completed the September evaluation. Among the group who evaluated their September COP experience, 30% were building and district administrators, 26% were educators and classroom personnel, 18% were school counselors, 15% were social workers, and 11% were school psychologists.

How do you rate your September COP experience (weeks 1-3)?

MIAMI UNIVERSITY

CENTER FOR SCHOOL-BASED MENTAL HEALTH PROGRAMS

How did the COP exceed your expectations?

[Follow-up question for those who responded 'exceeded expectations']

Much more material and much deeper material than I anticipated seeing.
Lots more resource material than I was expecting. It took a couple weeks to get into it all, but this has been very beneficial.
The materials are useful and I can view/read them on my own time.
The depth of information and the amount of information presented was spectacular. I found many great resources to utilize already!
More information that I had anticipated, flexibility that is critical.
I'm amazed by the amount of resources made available to us. Cricket is also very prompt and attentive. I've never been in an experience like this and did not expect this level of engagement and communication. It's been great. My hope is that face-to-face opportunities are made available but realize that may not be the case due to constraints.
The resources are practical and I have already used information and activities from them with staff and students!!
I love all of the resources we've been given so far!
I appreciate the many resources we have been given
So many great resources to take back to our teams.

If you'd like to share anything about your COP experience, please use this space:

[Follow-up prompt for those who responded 'met expectations']

The resources are excellent
Extensive info!
Overwhelming amount of information at times; like that it is all automatically saved to drive/folder and can look back on later.
There was so much info in the Mental Health Triage webinar that it is hard to unpack. I am sharing it with others because the info is so important. It would be great if someone created a way to chunk the info into 15-20 min segments that a principal could use with teachers for ongoing PD. For example - one session focused on just the overview and resources. Then another segment was about 3-4 of the signs and their respective classroom applications. If someone could edit your presentation like that - I think it would be amazing.

What needs to be changed so the COP meets your expectations?

[Follow-up question for those who responded 'did not meet expectations']

[no responses]
