

## PREVENTION SERIES:

### STRATEGIES & CONSIDERATIONS: ALIGNING SCHOOL PROGRAMS WITHIN A MULTI-TIERED FRAMEWORK

*Do you have a solid PBIS multi-tiered framework in place in your school or district? Are you implementing multiple initiatives such as social/emotional learning, trauma-informed practices, or mental health supports? This presentation will provide strategies for aligning all school programs within a PBIS framework to support systematic, school-wide implementation through one system, rather than trying to improve student outcomes through separate, competing initiatives. Participants will have the opportunity to hear from school personnel who have been successful in this endeavor.*

#### Objectives:

1. Provide a brief overview of MTSS and PBIS
2. Define the need for initiative alignment
3. Outline the steps for achieving effective alignment
4. Learn how an award-winning school has done the work

Audience: Educational Staff, Administrators, and Community Providers working in schools
