

Administration and Scoring of the Alternate Assessment for Students with Significant Cognitive Disabilities

Technical Assistance Virtual Office Hours

The Spring 2021 AASCD is the same test format that was administered in Spring 2020. New this year, ODE is offering on-demand, virtual training for test administrators. Completion of the on-demand training is required for any person who will administer the AASCD if they have not been previously trained.

The SST 3 will offer technical assistance sessions to support the on-demand information. Content will include a review of key administration component procedures that are relevant to the AASCD online assessment and Q&A. We ask that you submit questions in advance of attending any session using this form: <https://tinyurl.com/AASCDquestionnaire>

It is required that you complete the online modules for AASCD Test Administrators prior to submitting questions and attending a session.

Participants must register using the Zoom registration link. Please choose one session from the following options as each session will be the same content:
