

APPLYING THE SCIENCE OF READING IN THE 6-12 CLASSROOM

Facilitated by: Andrew Pinney

OVERVIEW

Ohio districts are shifting their instruction to align with the science of reading, but what does that really mean in practice? Come learn how the science of reading translates into structured literacy practices that can be applied in your classroom, regardless of the subject area.

According to the Ohio Department of Education, effective literacy instruction for grades 6-12 includes: “Students practicing regularly with complex text and its academic language, grounded in evidence from the text, including both literary and informational texts, and building knowledge through content-rich informational text.”

In this session, educators will learn strategies to apply the elements of effective literacy instruction, including vocabulary, comprehension, and writing strategies, to help build their students' proficiency in essential literacy skills.

INTENDED AUDIENCE

Any Grades 6-12 teacher who uses text in their classrooms and are looking for effective ways to apply the Science of Reading.

DATE/TIME

November 14, 2024
8:30 am - 3:00 PM

LOCATION

ESC of Northeast Ohio
