This Leadership Academy is specifically designed for current educational leaders who aspire to become Superintendents. It offers a valuable opportunity to connect with peers, expand your knowledge, and grow as a leader prepared to guide a school district.

Superintendents are expected to demonstrate expertise across a wide range of areas, including finance, climate and culture, operations, instruction, and more. This Academy will explore these critical components in depth, equipping participants with the tools and resources necessary for both the interview process and the demands of the role.

Participants will also benefit from a personalized 1:1 coaching session, providing targeted support to help you navigate your path to district-level leadership.
