

# ***Design Thinking Workshop***

## ***3 Wednesdays – 1 ½ hour virtual sessions***

### ***June 10, 17, and 24, 2020***

What is Design Thinking? Design thinking is a tool to solving complex problems. Design thinking asks us to work together to address everyday challenges in creative ways. As a design thinker you practice human-centered observation, critical research and analysis, innovation, and experimentation. Using this online professional development is interactive and collaborative. Participants will pose their own problem or challenge and then independently and collaboratively work toward creating a solution following a specific process to put the plan into action in your district.
