Centering Voices, Shifting Power: Amplifying Student Voice for Learners with Disabilities

This interactive session explores how educators and community partners can co-create learning spaces where students with learning disabilities are empowered to speak, lead, and shape their educational experiences. Through hands-on activities and reflection, participants will reflect on personal experiences and engage with strategies that cultivate awareness of others, critical consciousness, and authentic student-led advocacy. Grounded in research and lived experience, this session offers flexible, evolving approaches to amplify the agency and brilliance of students often left unheard.

No cost, but online registration is required.
