

EMIS Administrator Academy

June 27, 2019

This session is designed for building and/or district administrators desiring to learn more about EMIS and develop a greater understanding of the complexities of EMIS. Data governance and management of local, state and federal data sets is critical for funding, accountability and data compliance. Participants will also learn ways administrators can cause unintentional EMIS errors. We will discuss student, staff and financial data components and the various EMIS sub-systems that are used to process EMIS data for school districts in Ohio. Includes presenters from districts sharing administrative perspective.

Topics include:

- Overview of EMIS
- Impact of Data Quality
- EMIS Subsystems
- EMIS Data Resources and Reports
- EMIS Engagement Examples
