

# Evidence Based Intervention Methods in Autism Spectrum Disorder (Formerly TEACCH Training)

## June 22-24, 2021

This 3-day interactive workshop will provide participants with a basic working knowledge of TEACCH methodology and its role in working with students with autism spectrum disorders and other developmental disabilities. Participants will be introduced to structured strategies including physical structure, individualized daily schedules, work systems, and visually structured activities for students with diverse learning needs. These types of structures are well researched and are effective interventions for students with ADHD, cognitive disabilities, and learning disabilities as well as students on the autism spectrum.

**June 22:** offered virtually and will focus on Structured Teaching and Communication.

**June 23:** offered in-person and will focus on application of content from day 1

**June 24:** offered in-person and will provide the opportunity to create supports and activities to bring back to classroom

**Time:** 9:00 am - 3:00 pm (lunch is on your own)

**Cost:** \$500.00 per person

**Presenter:** Sloane Burgess, Ph.D.,  
Assistant Professor,  
Kent State University
