

# Level Up with Google Geekiness!

**December 13, 2017—Hacks**  
**February 21, 2018—Collaboration**  
**April 18, 2018—Creativity**

Whether you're a 1:1 district or a shared-device school, we need to embrace and integrate technology to make us more effective and efficient in the classroom--and to ensure that we meet our learners where they are. As more schools "go Google," we need to rethink how we teach, how we adapt, and how we innovate; in this case, specifically, how we innovate within the G-Suite framework: Docs, Sheets, Slides, Drawings, Forms, Classroom, and others.

- **Hacks** - This workshop is for users who understand the basics of Google apps but want to utilize the numerous (and sometimes unknown) tools, extensions, and add-ons that make life (and learning) easier.
- **Collaboration** - This workshop is for experienced G-Suite users who want to kick their instruction up a notch by exploring Google's collaborative in-app features to create engaging and productive lessons and projects for students.
- **Creativity** - This workshop is for experienced G-Suite users looking to modify and redefine teaching and learning by exploring and applying Google apps for high-level creation.

Facilitated by:

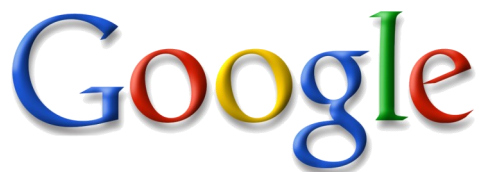

Stephanie DeMichele, Instructional Technology Consultant, Educational Service Center of Cuyahoga County

## Times:

9:00 AM—3:30 PM Course  
(8:30 AM—9:00 AM  
Registration)

## Cost:

\$65.00 per session.  
Lunch will be on your own.

## Registration:

[www.esc-cc.org](http://www.esc-cc.org); click on professional development/calendar of events.

## Graduate Credit:

Attend two or more sessions and 1 semester hours will be available at a reduced rate for purchase.
