I'm {a} Proud OF It Geek

Facilitated by: Stephanie DeMichele, Instructional Technology Consultant, Educational Service Center of Cuyahoga County

Whether you're a 1:1 district or a shared-device school, we need to embrace and integrate technology to make us more effective and efficient in the classroom--and to ensure that we meet our learners where they are. As more schools "go Google," we need to rethink how we teach, how we adapt, and how we innovate; in this case, specifically, how we innovate within the G-Suite framework: Docs, Sheets, Slides, Drawings, Forms, Classroom, and others.

- **Level 1 Basics -** This workshop is for users with little to no experience with Google tools who want to learn the essentials of G-Suite apps.
- **Level 2 Hacks -** This workshop is for users who understand the basics of Google apps but want to utilize the numerous (and sometimes unknown) tools, extensions, and add-ons that make life (and learning) easier.
- **Level 3 Collaboration -** This workshop is for experienced G-Suite users who want to kick their instruction up a notch by exploring Google's collaborative in-app features to create engaging and productive lessons and projects for students.
- **Level 4 Creativity -** This workshop is for experienced G-Suite users looking to modify and redefine teaching and learning by exploring and applying Google apps for high-level creation.

Times:

9:00 AM—3:30 PM Course
(8:30 AM—9:00 AM
Registration)

Cost:

$65.00 per level or $200.00 for all four levels.

Lunch will be on your own.

Google

Registration:

www.esc-cc.org; click on professional development/ calendar of events.
