

Literacy in the Primary Grades: Getting Students Reading for Meaning

Students do not need to learn to decode before they learn to comprehend. Both skills can be taught simultaneously starting in the primary grades.

This workshop is for K-2 teachers, Intervention Specialists, and those who work with students in the primary grades.

In this session, participants will learn rigorous, instructional strategies to deepen student understanding through metacognition. We will focus on the strong foundational skills necessary to comprehend text, including making inferences, predicting, summarizing and writing arguments.

Date:

January 29, 2018

Location:

ESC of Cuyahoga County
Essex Place
6393 Oak Tree Blvd, South
Independence, Ohio 44131
