

Math Community Collaborative 2026–2027 School Year

New This Year!

In response to the ever-changing landscape of math teaching and learning, this Math Community of Practice brings educators together to strengthen both assessment and instruction.

This experience is designed to connect districts across the state, providing a valuable opportunity to **learn alongside peers and deepen the effective use of current resources and materials.**

Participants will be grouped by the resources they use, **creating space to share best practices, ask questions, and learn from one another** across both Ohio's approved diagnostic assessments and high-quality instructional materials.

Through flexible conversations and guiding questions **shaped by participant feedback** and real-time needs, educators will engage in meaningful dialogue and collaborative problem-solving.

Monthly Virtual Sessions after Math in Action 11:00 – 12:00
