

## NORTHEAST OHIO SCIENCE SPECIALISTS (NEOSS) NETWORK

Over 50 educators attended the third meeting of the new NEOSS Network, 3/1/17, which focused on Modeling Instruction. We were fortunate to have two area educators, Holly McTernan (St. Edward High School) and Jeremy Secaur (Elyria High School), facilitate a Physical Science Modeling experience.

**The fourth (and final) meeting of the NEOSS Network for the 2016-2017 school year is scheduled for Friday, 5/19/17, at the ESC-CC. We are extending the Modeling Instruction work from our previous meeting, and having educators by grade level strand or science discipline develop Modeling Instruction lessons. If you are going to attend, bring resource materials necessary for your planning. In addition, we will provide an update on the current status of the Ohio Science Learning Standards Revision process.**
