

One Plan Implementation Network

May 1, 2024

State Support
Team

Join the SST3 to participate in a network designed to bring LEA's together in support of one another through One Plan implementation process. Together we will explore resources and strategies grounded in evidenced-based practice that promote successful implementation of strategies and action steps. All resources can be used throughout the 3 years of your plan.

In this collaborative environment, we will:

- Identify specific tools to use as a leader to effectively monitor your One Plan.
- Identify specific monitoring data for TBT, BLT, and DLT aligned to your strategies and how to understand the data.
- Examine how to use effective data analysis and practices that support collective efficacy and productivity for all teams.
- Provide support in utilizing the Ohio Improvement Process to implement your One Plan with intentionality.
- Participate in a network of colleagues to share practices that are working in the field.

Audience: These sessions are designed for all 3 One Plan cohorts. Please join us to help build capacity.

.....
To Register, click on the link below for your session.

District Schools (9:00 a.m. - 11:30 a.m.)
