Project-Based Learning (PBL) 201

Beyond the Basics!

November 13, 2019

Presented by:

Dr. Kate O'Hara, PBL educator and researcher

You've learned the basics in PBL 101.

Now extend your learning in PBL 201!

A major hurdle in implementing PBL in the classroom is that it requires simultaneous changes in curriculum, instruction and assessment practices – changes that often are foreign to practicing teachers.

In this PBL 201 professional development workshop, we will further develop approaches to designing, implementing, and evaluating project-based curricula. In PBL 201, participants will explore the research and processes for PBL curriculum development that have emerged from collaboration with PBL practicing teachers and researchers.

Dr. Kate O'Hara is an assistant professor of research for STEM Education in the College of Education and Human Services at Cleveland State University. Dr. O'Hara teaches Project-Based Learning for the CSUTeach program, which licenses secondary mathematics and science education majors. Also, she spends considerable time in the field supervising and coaching pre-service math teachers. Dr. O'Hara is an integral member of the STEM Education Center at Cleveland State University, where she leads professional development in Project-Based Learning and in the Engineering is Elementary program.

**Space for this event is limited.
Advance registration is required.**
