

PBL NETWORK

Project Based Learning

Project based learning is one of the hottest topics in education today! It adds the context and meaning needed for students to think deeply and truly engage with content. Now more than ever, students need to cultivate the success skills of collaboration, critical thinking, communication, and innovation in order to be competitive in both college and career and educators need support to build collaborative classroom cultures. Our goal is to create a PBL network to share resources and support, explore questions, and offer authentic experiences that model the PBL mindset and methodology. Together we have the opportunity to provide students in northeastern Ohio with skills that make their knowledge of content marketable as they seek admission to college and/or the workplace. We believe that we are stronger together!

DATE:

SEPTEMBER 26, 2017
