

# PROJECT BASED LEARNING (PBL)

## PBL 101: January 24, 2018

Project Based Learning (PBL), is a teaching method in which students gain knowledge and skills by working through a process of sustained inquiry in response to a complex question, problem, or challenge. This interactive workshop led by ESC consultant who was trained by Buck Institute for Education (BIE) and implemented PBL's in grades 7-12 - workshop facilitator has three basic parts: Project Design, Assessment, and Management. It is designed to teach the basics of PBL through exemplifying the experience of a project, video analysis of best classroom practice, exploration of PBL tools and project libraries, and development of a project with opportunities for critique and revision. Workshop includes *BIE's PBL Starter Kit* book. Grade-level or content-area teams are strongly encouraged to attend together for an enhanced PBL design experience.

## PBL 201: Date to be Determined

Teams will work to go deeper into the PBL process. Participants are also asked to bring a PBL design idea along with supporting resource materials. We will focus on:

- **Align to Standards - Balancing Student Learning Goals**
- **How to Manage Activities - Creating Effective Team Roles**
- **Build the Culture - Quality Work**
- **Assessment of Student Learning - Using Standards-Aligned to Rubrics**
- **Scaffold Student Learning**

**Teams are encourage to attend both however, it is Not a requirement.**
