

STUDENT SUPPORTS COLLABORATIVE NETWORK

The Student Supports Collaborative Network provides year-long, practical support for schools to improve outcomes for all students. Participants will collaborate with ESC consultants and district peers to strengthen data use, instructional practices, and intervention systems.

Sessions alternate between in-person learning and virtual check-ins, allowing teams to apply, reflect, and refine their work throughout the year. Key topics include IMTSS, data dashboards, HQIM, scaffolding, evidence-based practices, and the Struggling Learner Simulation.

Targeted Audience: Administrators, Teachers, Building-level teams that include math and reading content experts.
