THE FUTURE OF LEARNING
PRESENTED BY

January 18, 2018

Audience

Superintendents, assistant superintendents, directors, central office personnel, principals, assistant principals, teachers and other interested educators.

About KnowledgeWorks

KnowledgeWorks is an Ohio-based non-profit social enterprise that works to foster meaningful personalized learning that enables every student to thrive in college, career, and civic life.

KnowledgeWorks works on the ground with schools and communities through a portfolio of innovative education approaches, helps state and federal leaders establish the policy conditions necessary to prepare all students for success, and provide national thought leadership around the future of learning.

The Future of Learning

How might changes in the broader landscape affect what learning looks like in ten year? *KnowledgeWorks* explores the future of learning to help education leaders and innovators anticipate change, explore strategic possibilities and identify ways of creating better opportunities for all learners.

Our strategic foresight team creates forecasts on the future of learning, takes deep dives into critical education issues and suggests ways of translating insights about the future into action today. Discover ways of illuminating new possibilities for learning and for the organization.

While we can't know how the future of learning will unfold, we can shape it in ways that work more or less well for learners. We can all act as agents of change by using foresight to guide our strategic choices today.

Interested in exploring the future of learning?

Don't miss this workshop!
